NOVAtime 2000 "PC Key-In Module"

Take a Closer Look at What Sets Us Apart?

- **PC Key-In Module with Thin Client Environment for Corporate Intranet / WAN environment**

NOVAtime offers a PC Key-In module for entering time punches from your PC's. The PC Key-In software performs like a *data collection terminal*.

The PC Key-In module has keys and features similar to a time clock. Similar to a data collection terminal, it displays a general greeting and selected messages for specific employees.
